Career Objective

Third-year B.Tech CSE student specializing in Cybersecurity with hands-on experience in development and cybersecurity practices. Smart India Hackathon 2025 Winner with national-level project experience in building scalable solutions. Experienced database-driven systems, vulnerability assessment, and penetration testing tools. Strong foundation in Data Structures, DBMS, and network security. Passionate about solving real-world technical challenges through secure and efficient development.

Technical Skills

Languages:	Python, SQL, Java, C (basic)
Web Development:	HTML, CSS, JavaScript, React Js
Tools & Platforms:	Kali Linux, Wireshark, Burp Suite, Visual Studio, Git, GitHub
Databases:	MySQL
Security:	Reconnaissance, Enumeration, Network Scanning, Vulnerability Assessment, Penetration Testing Tools, OSINT

Educational Qualification

Bachelor of Technology, Computer Science and Engineering with specialization in Cybersecurity	2023 – Present
Noida Institute of Engineering and Technology, Greater Noida	7.98 CGPA
Senior Secondary Education, CBSE Board	2022
Saint Joseph's School, N.T.P.C Kahalgaon	77.6 %
Secondary Education, CBSE Board	2020
Saint Joseph's School, N.T.P.C Kahalgaon	89.8 %

Internship

Cybersecurity Intern Redynox	<i>Sep 2025 – Oct 2025</i>
- Assisted in security testing and validation of systems to ensure compliance with security standards. - Worked on vulnerability analysis and system hardening practices in controlled environments.	

Projects

Cyber Shield (A Cyber Security Toolkit)	<i>Mar 2025 – April 2025</i>
<i>A web-based cybersecurity tool for phishing detection and malicious IP analysis</i>	
- Developed an intelligent cybersecurity detection system using custom logic to identify phishing URLs and analyze malicious IPs by evaluating URL patterns, IP reputation, geolocation data, threat intelligence, and risk severity with actionable security recommendations.	
Herbal Trace (Blockchain Project)	<i>Aug 2025 – Dec 2025</i>
<i>Blockchain based traceability for ayurvedic herbs</i>	
- Built a blockchain-based system to ensure transparent and tamper-proof traceability of Ayurvedic herbs across the supply chain. - Designed architecture integrating Blockchain, AI, and IoT with geo-tagging and stakeholder verification.	

Achievements

- Smart India Hackathon 2025 (National Level) - Winner

Certifications

- CyberSecurity and Hacker Tactics Awareness Training - Certified Ethical Hacker - EC Council	<i>View Certificates Ongoing</i>
